

## Thuraya GSM

### About Thuraya LeisureComms

Thuraya LeisureComms includes satellite phones and broadband terminals that ensure you're never far away from the comforts of home. Make voice calls to your loved ones, send emails, SMS, and faxes, or browse the Internet at high-speeds. And do it all with water, dust, and shock resistant equipment that fits in your pocket or rucksack. Get a signal in seconds wherever you are, without worrying about complicated settings or racking up a huge voice or data bill.

### About Thuraya GSM

The innovative Thuraya GSM Solution provides added convenience for users needing to communicate outside of the GSM network range. It is used to extend GSM services to remote locations (mobile locations) with Thuraya IP as the backbone link. It gives end-users added mobility, more freedom and fewer restrictions on their communications.

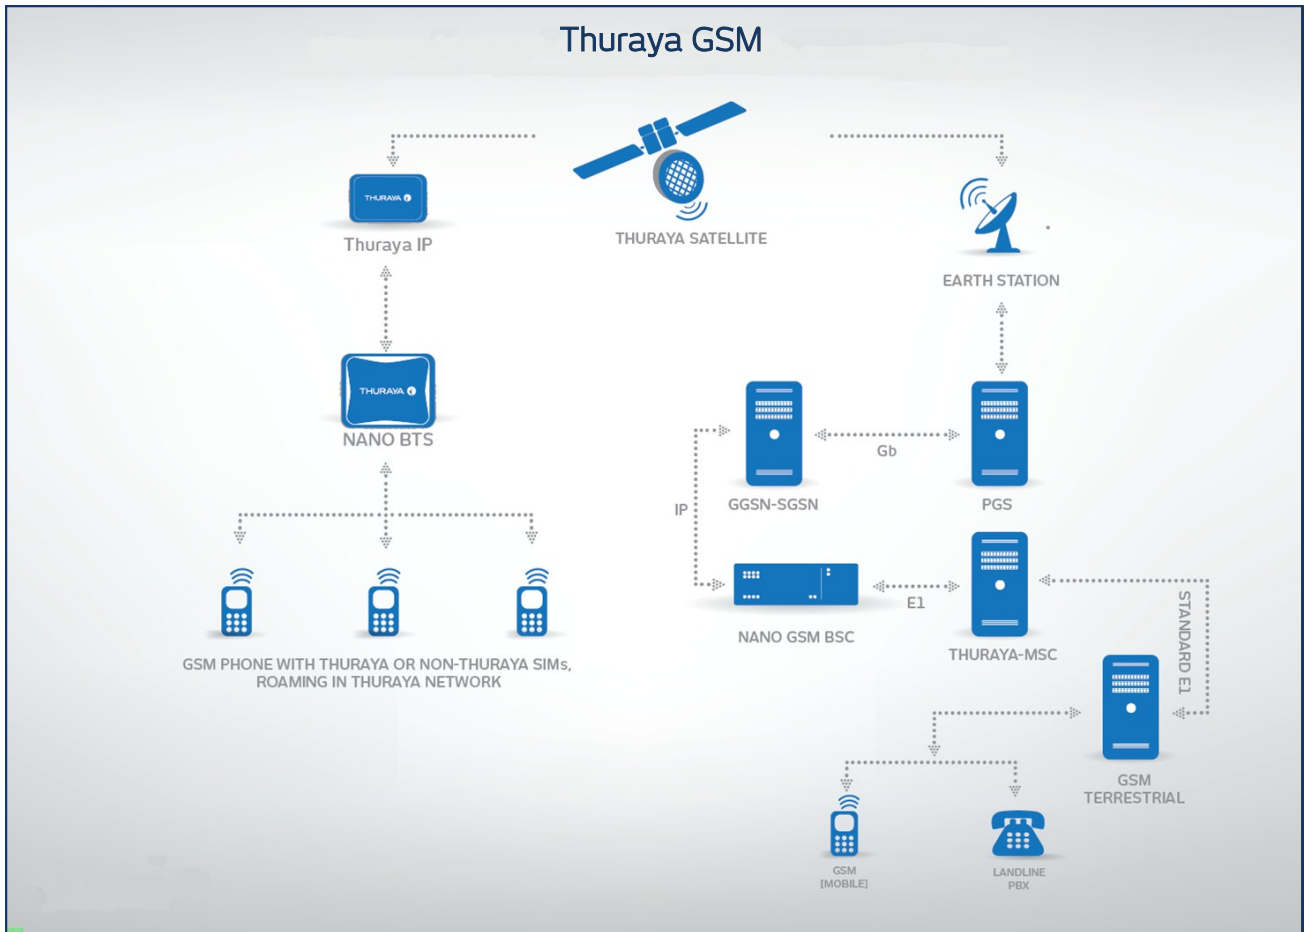

### Who uses this solution?

Thuraya GSM is an excellent solution, which can accommodate the various communication needs of the Oil & Gas industry. It is an ideal companion for organizations with units on the move who need to rely on clear, steady connectivity and uninterrupted communications.

### How does it work over Thuraya IP?

Thuraya GSM users can enjoy the convenience of using a GSM phone in remote locations since the calls are actually established over satellite in the packet mode. Its main function is to allow GSM roaming in remote and isolated locations where GSM services are generally not available. The IP access is used along with THIP terminals in both standard and streaming mode if needed. Users of this reliable solution can enjoy several benefits such as the ease of deployment of remote GSM networks and its simple, swift operation.
