

SPACETECH FOR MEDICINE TELEMEDICINE SOLUTION

THURAYA 

WHAT IS THE CUSTOMER CHALLENGE?

- Limited access to doctors and medical services in remote regions
- Rapid need of connectivity for emergency services and first responders in disaster-stricken areas and refugee camps
- Military medical personnel on the field require medical services

WHO IS FACING THIS PROBLEM?

- Health Ministries
- Military
- NGOs (UN, Medicines Sans Frontières, etc)
- Enterprise (Oil & Gas, Mining, etc.) operating in remote sites such as oil rigs, mines, etc

SOLUTION DESCRIPTION & CAPABILITIES

Solution Description

Niflink Telemedicine

Links people from technologically underdeveloped areas to much needed healthcare services. Improves remote diagnostics process.

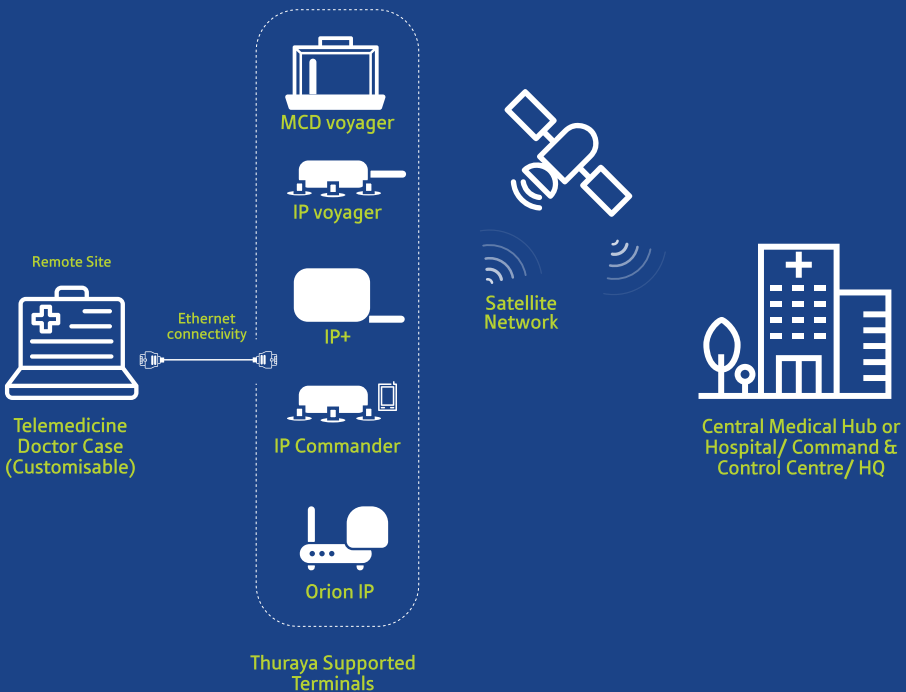

Capabilities

- Fast diagnostics and treatment
- Efficient and reliable medical technology
- Medical access for people in underserved areas (military, battlefield, etc.)
- Reduced medical overhead costs
- Customisable solutions based on project requirements
- Promotes airtime usage and creates stickiness for our connectivity services
- Additional revenue stream for Thuraya and service partners

IMPACT

- 1 Immediate response in Disaster Response situations
- 2 Defence Medical Services can use Telemedicine to improve patient outcomes
